PROFILE

I am a Full-Stack Web Developer who has just graduated from the 12 week Full-Time Web Development course at General Assembly. I enjoy learning and applying both front-end and back-end languages and have previously built full stack applications through a Certificate IV in Programming at Tafe NSW.

I am also passionate about Youth Work after having volunteered domestically and overseas. My aim is to one day incorporate both passions to provide an accessible, supportive environment where young people can be introduced to coding.

SKILLS

Languages:
HTML5, CSS3, Javascript, Ruby, Node.js, C#, Java
